

LAA Delivery Plan

NI 45

Draft 25th June 2008

Delivery Planning for the LAA (2008/11): The Context

Please answer the following questions to help set the context for this LAA delivery plan. This will also provide assurance that the relevant, minimum standards have been met in terms of delivery planning.

What the plan is seeking to achieve? Please include details of the people and places it will affect, linking it back to the persuasive rationale.
The Plan is aiming to achieve the prevention of crime and anti-social behaviour through the provision of services which meet assessed needs of young people. Plans are seeking to reduce the numbers of young people entering the youth justice system, preventing anti-social behaviour and reducing the numbers of young people who re-offend. Young people's education, training and employment needs are seen as a major criminological factor and therefore support in this area is essential if re-offending is to be reduced.
Who is the activity intended to affect/benefit? Who else might the activity impact one? Please consider factors such as age, gender, religion, race, sexuality, disability. If there is likely to be a negative impact, what actions will you take to mitigate against this?
The actions in this plan seek to benefit the individual child or young person, the family unit and ultimately the wider community. Gender, age and ethnicity will be monitored to ensure that any disproportionality is addressed.
Are the activities set out in the plan, accessible and inclusive? Have you considered the barriers to access? How will you overcome these barriers?
It is envisaged that the identification of these indicators as Staffordshire's priorities will enable the development of greater collaboration between partner agencies through a sense of shared ownership of the outcomes.
Under Section 17 of the Crime and Disorder Act, all local authorities, police authorities and other agencies must consider crime and disorder reduction and community safety in the exercise of all their duties and activities. How have you met this requirement in developing this plan?
Reducing first time entrants into the youth justice system and improving education, training and employment for young people directly contributes to the prevention of offending and re-offending and increased community safety
How have you considered the impact the activities in this plan may have on climate change?
No impact identified.
