An Index has been created to compare the above area with England. The scores for England always equals 100, therefore a score of less than 100 indicates fewer people or households in that category for the area compared with England. A score over 100 indicates more people or households in that category for the area compared with England.

Indices of Multiple Deprivation 2007

Understanding this information

The colour shading highlights where the LSOA is in the top 10%, 20% or 30% most deprived areas in England for that measure of Deprivation.

The LSOAs are ranked here according to their overall multiple deprivation score: most deprived to least deprived. The national ranking (out of 32,482) is shown in the top table, where 1=most deprived and 32,482=least deprived. The bottom table replicates the information but putting the ranking into a percentage, so that it can be seen where the LSOA falls within the whole country. The deprivation domain titles have been abbreviated.

Background to the Indices of Multiple Deprivation 2007

The English Indices of Deprivation 2007 (ID 2007) are the Government's official measure of multiple deprivation at small area level. The 2007 Indices update information provided in the IMD 2004.

The IMD 2007 provides a relative ranking of areas across England according to their level of deprivation.

The Index of Multiple Deprivation 2007 (IMD 2007) is based on the small area geography known as Lower Super Output Areas (LSOAs). LSOAs have between 1000 and 3000 people living in them with an average population of 1500 people. In most cases, these are smaller than wards, thus allowing the identification of small pockets of deprivation.

The IMD brings together 37 different indicators which cover specific aspects or dimensions of deprivation: Income, Employment, Health and Disability, Education, Skills and Training, Barriers to Housing and Services, Living Environment and Crime. These are weighted and combined to create the overall IMD 2007.

The majority of the data underpinning the IMD 2007 represents 2005 although some data covers a number of years, for example an average of 2003-2005.

This is taken from the Guidance for Using the English Indices of Deprivation 2007 produced by Communities and Local Government: <http://www.communities.gov.uk/documents/communities/doc615986>

Foundation Stage Profile Attainment

The Foundation Stage Profile allocates a point score for each child in 13 areas of learning. The results below indicate the number and percentage of children who have achieved a score of 6 or above. This threshold has been chosen as it is the expected level of attainment as stipulated by the Department for Children, Schools and Families.

	National	County	District	2005		2006		2007		CLP - National	CLP - County	CLP - District	Trend 2005-07

Key Stage One to Four Attainment

The National Curriculum for Key Stage One through to Key Stage Four runs through Year 1 to Year 11. The expected level of attainment for Key Stage One is Level 2B or above, Key Stage Two is Level 4 or above, Key Stage 3 is Level 5 or above and at Key Stage 4 the new level of expected attainment is 5+ A*-C including GCSE English and Mathematics. The results below indicate the number and percentage of children who have achieved these thresholds. These thresholds have been chosen as it is the expected level of attainment as stipulated by the Department for Children, Schools and Families.

The key has been designed to try and help indicate areas of difference. In this section it has been agreed that a minus figure actually represents a reduction in need. The colour coding has been set at +5% for Free School Meals or Special Educational Need. Therefore if the Free School Meals is 5% below county it will be coloured green and if it is 5% above county it would be coloured red.

The Staffordshire IMD 2007 Summary Card:

Stafford Borough

This card presents a summary of information from the 2007 update of the national Indices of Deprivation (IMD 2007). It is an attempt to summarise, on one piece of paper, information on deprivation in the area covered by Stafford Borough. The key information covered here includes the overall multiple measure of deprivation, seven different domains (types) of deprivation and two indices focusing respectively on income deprivation affecting children and older people. There are ten pieces of data for each of the eighty Lower Super Output Areas in Stafford Borough. Eight hundred bits of information on one piece of paper.

By its very nature this document presents an overview of all deprivation in Stafford Borough in 2007. Further detail on deprivation in Stafford Borough can be found in the complementary, more detailed borough report available from the Staffordshire Observatory website. Also available are the equivalent documents for the other seven districts/boroughs in Staffordshire and a County document. For further details go to: <http://www.staffordshirepartnership.org.uk/observatory/> or contact Rosanne Cororan on 01785 276538 or email Rosanne.cororan@staffordshire.gov.uk.

Background to the IMD 2007

- The English Indices of Deprivation 2007 (ID 2007) are the Government's official measure of multiple deprivation at small area level. The 2007 Indices update information provided in the IMD 2004.
- The IMD 2007 provides a relative ranking of areas across England according to their level of deprivation.
- The Index of Multiple Deprivation 2007 (IMD 2007) is based on the small area geography known as Lower Super Output Areas (LSOAs). LSOAs have between 1000 and 3000 people living in them with an average population of 1500 people. In most cases, these are smaller than wards, thus allowing the identification of small pockets of deprivation.
- The IMD brings together 37 different indicators which cover specific aspects or dimensions of deprivation: Income, Employment, Health and Disability, Education, Skills and Training, Barriers to Housing and Services, Living Environment and Crime. These are weighted and combined to create the overall IMD 2007.
- The majority of the data underpinning the IMD 2007 represents 2005 although some data covers a number of years, for example an average of 2003-2005.

This is taken from the Guidance for Using the English Indices of Deprivation 2007 produced by Communities and Local Government
