

Staffordshire Joint Strategic Needs Assessment for Children and Young People: Summary

This document is a summary of the key indicators identified within the Staffordshire Joint Strategic Needs Assessment for Children and Young People.

The current benchmark and the general trend are given for the County and districts (where possible). In reviewing the County data, comparisons are made against the England average and also ranked on a 1 to 5 scale against its four closest 'statistical neighbours'.

The following abbreviations/symbols have been used:

- | | | | |
|---|--|-----|--|
| ↑ | = indicates a high value | * | = PCT level data only
(it has been assumed that the districts share the same value as the 'parent' PCT) |
| ↓ | = indicates a low value | NA | = no robust data currently available / not applicable |
| ↔ | = no significant difference | NAT | = no apparent trend |
| ↗ | = an upward trend | NI | = data not included within the report |
| ↘ | = a downward trend | NPE | = national prevalence estimates used |
| ■ | = an adverse outcome or trend | Y | = hotspot areas |
| ■ | = a positive outcome or trend | N | = no hotspot areas |
| 1 | = the rank (1 to 5) within its 'statistical neighbours', where 1 represents the best outcome | | |
